the presence of these hidden sappors and miners.

A gradual wasting away or emaciation of these is no not of the most common attendants upon worms. They absorb the animal juices, and destroy he nourishment imparted to the atomach by whole some diet, thereby occasioning a variable appetition and a strong desire for indigestible food.

The stomach has, unloubtedly, a very great sympathy with other parts of the body. This is the case with respect to the irritation produced by worms, especially those existing in the atomach tiself. They give rise to many other diseases, and patients often adjoint incredibly without being awars of the cause.

Many a helpless child has been laid in the grays.

If the cause.

Many a holpless child has been laid in the grave when the disease which caused its death has beer entirely misunderstood, and when worms have really been the cause. It has been proved beyone and that worms exist in the human system from arritest in fancy, therefore parents—especially mothers, who are more constantly with their child ren, cannot be too observing of the first symptoms of too man, for so surely as they exist, can they be excluded a specially removed from the most delicate infant, by the timely use of B. Physicians do not hesitate to recommend it and Physicians do not hesitate to recommend it and

rhysicians do not hositate to recommend it and ase it is their practice, and many of the most emigrat of the profession, from all parts of the country testify to its uniform success. In fact, it never fails. It has frequently been given to children to a safe purgative, not suspecting the cause of the liness, and large quantities of worms were discharged and immediate relief afforded.

Great caution must be used by every purchaser o be his own judge in one sense, and to examine very bottle he buys of it. The simple name of FARNESTOCK is not sufficient. He must look closely and carefully to see that the initials are B. A. FARNESTOCK, and be satisfied with nothing else.

It is so simple in structure, that any one who can sew on our machine c: n use it, and without instruction. It may be attached to or detached from the machine in an instant. Without a lengthy describe the great variety of work that this little in strument will do. The reader must not suppose that what we speak of is a mere chain stitch operation, which is sometimes humayously termed embroidery. If desired, three colors of any kind of thread may be used at any one time, and the colors or thread may be changed at the will of the operator, by removing the spools in use and putting others in their stead; thus as many or as few colors may be used as the operator wishes, in the embroidering of any garment. A great variety of results are produced by the manner in which the tensions are regulated. Different results may be produced while the machine is in motion by simply changing the tensions. Results vary according to the length of stitches, kinds, colors and tensions of the threads, as well as sizes of the needles used. The Embroiderer will nee any kind of thread. The use of zephyr worsted for certain purposes gives very pleasing results. In order to get a just idea of this valuable attachment it will be necessary to see it in operation.

such as Coughs, Colds, Whooping
Cough, Bronchitis, Asthma,
and Consumption.

Probably never before in the whole history of medicine, has anything won so widely andso decyly upon the confidence of mankind, as this excellent remedy for pulminary complaints. Through a long scries of years, and among nost of the races of men it has risen higher and higher in their estimation, as it has become better known. Its uniform character and power to cure the various affections of the lungs and throat, have made it known as a reliable protector against them. While adapted to milder forms of disease and to young children, it is at the same time the most effectual remedy that can be given for inci-Shildren, it is not the same time the most effectual remedy that can be given for incipient consumption, and the dangerous atlections of the throat and lungs. As a provision against sudden stracks of Croup it should be kept on hand in every family and indeed as all are sometimes subject to colds and coughs, all should be provided with this antidote for them.

Although settled Consumption is thought incurable, still great numbers of cases where the disease seemed settled, have been completely cured, and the patient restored to sound health by the Cherry Pectoral. So complete is its mastery over the

toral. So complete is its mastery over the disorders of the lungs and throat, that the most obstinate of them yield to it. When nothing else could reach them, under the Cherry Pectoral they subside and disap-

pear.
Singers and Public Speakers find great Asthma is, always relieved and often wholly cured by it.

Bronchitis is generally cured by taking the Cherry Pectoral in small and frequent

So generally are its virtues known that we need not publish the certificates of them here, or do more than assure the public that its qualities are fully maintained.

### Ayer's Ague Cure,

The great advantage of the method employed to separate the grain from the straw in this machine is unmistakeable. It is reputed to save enough on an average over other kinds of machines, to pay the farmers' threshing bill, and its superiority is readily conceded by all except "agents" and "manufacturers" of the old style, who are blinded by conflicting interests.

Meanwhile the demand is such that those whithis improved Thresher MUST ORDER EARLY.

We know and feel the importance of not only supplying the users of our machines, but the trade generally with the best quality of Macanax Twist, which we sell by measure rather than by weight. The system of selling by weight has given manufacturers the opportunity of so heavily weighting Silk in the process of dyeing as not only to greatly injure its quality, but also convey a wrong impression about its quantity. In this respect we mean to be above suspicion. The manner in which the sizes of silk are graduated is also a matter or great importance, but we use the greatest possible care that the graduating shall be exceeding accurate. In addition to manufacturing from the best quality of raw silk, the evenness of thread and beauty of finish of the manuactured article will not we think, he soon surpassed.
